Abstract

Partnership is the relation between the persons who have agreed to share the profits of a business carried on by all or any of them acting for all. Section 4 of the Indian Partnership Act, 1932 deals with Partnership. In this paper it is analysed that the division of profits is considered to be an essential element for the existence of healthy partnership.

An empirical study about healthy business relationships is done where the responses of 120 students are collected to know about their opinion. Analysing the data it is found that there are several key factors like being aware about the rights and duties of partners, honesty & mutual trust and communication play a vital role in building healthy business partnership. It is concluded that Partnership is a good form of doing business by making partners and achieving big goals. Nowadays Partnerships are still preferred by professionals, small trading and business enterprises.

Keywords - partnership, partners, business, profits

I. INTRODUCTION

Partnership is considered as the relation between the persons who have agreed to share the profits of a business carried on by all or any of them acting for all. Partnership is an unincorporated business structure that two or more parties form and own together is called a partnership. In India partnership is governed by the Indian Partnership Act, 1932.
